PROJECTS

Landing Page Project

09/2024 Bijnor, India

This project is a responsive landing page created using HTML, CSS, and JavaScript. It is designed to showcase a clean and modern web layout suitable for various purposes, such as personal portfolios, small business sites, or product presentations.

- Responsive Design: Adapts to different screen sizes (desktop, tablet, and mobile).
- Clean Layout: A simple yet elegant interface with easy navigation.
- Interactive Elements: JavaScript-powered features for dynamic user interaction.

Personal Portfolio

09/2024 Bijnor, India

This portfolio highlights my journey as a software developer. It includes personal projects that demonstrate my skills in Python, web development, and more. You'll find detailed descriptions of each project, along with links to GitHub repositories.

- Responsive Design: Works seamlessly on mobile, tablet, and desktop.
- Project Gallery: A dedicated section for showcasing my latest projects.

Custom Voice Assistant - Buddy

08/2024 Bijnor, India

Buddy is a Python-based Voice Assistant designed to automate and simplify daily tasks using voice commands. The assistant can play music from YouTube, provide the current time, search the web, tell jokes, and manage system functions like opening applications or shutting down the computer.

- Voice Recognition: Utilizes the PocketSphinx (CMU Sphinx) library to capture and interpret voice commands.
- Text-to-Speech: Uses the pyttsx3 library to convert text responses into speech, with a male voice configuration.
- Joke Telling: Delivers a random joke using the pyjokes library.
